

SPECIFICATION

Range: **ARIANNA**

Design: **Caimi Lab**

Code: **6018-BO**

Dimensions: height 180 cm

Description: 25 x 25 mm uprights made from ø 9 mm steel rods and pairs of ø 8 mm horizontal rods, electrowelded together and with a matt white epoxy-powder coating. The pairs of horizontal rods are spaced 375 mm apart. At the lower ends of the uprights, the rods are welded to a milled threaded bushing which allows it to be attached to the base using an M8 countersunk screw. The bushing has a reference notch to ensure it is fitted correctly to the base. The upper ends of the poles are finished off with translucent PETG stoppers. Matt white 6 mm thick, epoxy-powder coated steel base. The base has a central hole to insert the upright and two notches so it can be assembled orthogonally or at an angle of 45° in relation to the upright.

Code: **6312**

Dimensions: lenght 100 cm, height 169,5 cm

Description: Description: flexible polycarbonate panel, made of 0.75 mm thick translucent two-sided satin finish, shaped and perforated on the sides for assembly and coupling to the uprights. The polycarbonate with satin finish on both sides allows excellent passage of light. The panel is fitted with translucent high-tech polymer connectors to fasten it to the uprights. The connectors make it possible to assemble from 1 to 4 panels on each upright.
